ASSOCIATE
DEAN OF THE COLLEGE

Dear Jack,

I wrote the enclosed letter to President Burns for two reasons. At the meeting at which the demands were presented, you said that you would discuss the demands with him before making a response. The establishment of a Third World House will have an important effect upon the campus climate.

As you know, the Committee on Multi-Disciplinary Programs is charged with the responsibility of making recommendations "affecting all factors of campus environment which contribute to, or detract from the initiation, development, and enhancement of multi-disciplinary programs."

I know that the B.S.U may regard an effort on the part of this Committee to consider their demands as a delaying tactic. Nevertheless, hasty action on this request may lead to changes in campus climate which are not consistent with the long range objectives the Committee has been asked to try to achieve.

Sincerely yours,

Cliff
